

## Notes from Nurse for Parents/Guardians

1. All new students and transfer students must have an updated physical exam from their doctor with immunizations listed.
2. Early Learners, Pre School, Pre-K and Kindergarten have an information sheet re: immunizations and physicals, which must be turned into the School Nurse.
3. Any child with food allergies must send in Epi pen and have an up-to-date Allergy Action plan signed by their doctor and parent, along with emergency contact info.
4. We are a peanut nut/tree nut aware school. We are not nut free. We have a nut free table for kids to sit at during lunch.
5. Any student with asthma must send in an inhaler in the prescription labeled box, along with Asthma Action Plan signed by the doctor and parent.
6. Please do not send sick kids to school. We want to keep a healthy environment (especially during current times). Student must be fever-free, no diarrhea or vomiting for 24 hours prior to coming back to school. For example if I send a student home today for vomiting, fever or diarrhea, they cannot come back to school the following day.
7. Nurse needs to be aware of any daily medications the students are on.
8. If your student has strep throat or conjunctivitis or any contagious disease, the nurse needs to be called.
9. If you have any questions or concerns, please call the school and ask to speak to the nurse.

Thank you,  
Pamela Campbell, RN
